

# UNBODIED, 2005 (*paper, toner, marginalia, gestalt*)

[OR, PERIMETER I:

AN EXPLORATION OF A SHAPE WITHOUT SUBSTANCE,  
DEFINED SOLELY BY BOUNDARIES<sup>1</sup>]

<sup>1</sup> Inspired by a discussion with Ken James about G. Spencer-Brown's "Laws of Form", which sets forth a notation for boolean algebra based on two elements: the void (empty space), and the mark which defines a boundary within the void. "The theme of this book is that a universe comes into being when a space is severed or taken apart."<sup>2</sup>

<sup>2</sup> Laws of Form, 1972 edition, p. v.
